

COLOMBO

*Direct Delivery
Pneumatic Tube Systems*

50 years of delivering results

Colombo Sales & Engineering was the first company to work with Healthcare Organizations to show that pneumatic tube systems are a critical link for the transport of Blood Specimens and Pharmaceuticals in a reliable, timely, and safe manner.

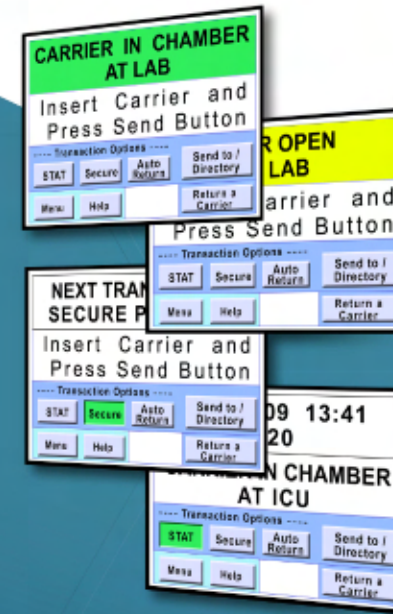

WHY USE A DIRECT DELIVERY SYSTEM?

Global Network Tube Systems do a great job of connecting an entire facility, but certain areas of a hospital have a more urgent need than global systems can accommodate. Direct Delivery Systems are the ideal solution for your facility's highest traffic and most demanding critical care areas.

- The fastest delivery times in the industry.
- Deliveries can be sent immediately, without waiting for system traffic to clear.
- "Clean" and "dirty" can have dedicated systems, completely eliminating the possibility of cross-contamination.
- Keeps staff where they should be - with patients - not wasting valuable time transporting items.

FAST, SECURE AND DEDICATED

- Dedicated route systems with digital controls and touch screen operation
- Shortest transaction time of any tube system
- Unobtrusive recessed stations in convenient locations.
- Available safeguards including chain-of-custody accountability for sensitive items and controlled substances.
- Security features, such as card readers, ensure only authorized staff members send or receive controlled substances and biometric security ensures sensitive items don't end up in the wrong hands.

FEATURES AND BENEFITS

- Easy to use system controls.
- User friendly color touch screen panels
- STAT transaction
- Auto-returns
- Silent and soft carrier delivery
- Administration and maintenance features
- Logging and carrier tracking

OPTIONAL FEATURES

- Automatic station locking for secure transactions.
- Proximity card readers
- Biometric security (thumb print access)
- Audio and visual remote alert

WHAT ARE YOUR OPTIONS?

Install only a Global Network System and let your high traffic and critical care areas suffer.
 - or -
 Use your global system for what it was designed for and ease the burden on your more demanding departments, providing your patients with exceptional care.

Send everything through one system - blood, specimens, biopsies, pharmaceuticals, paperwork, etc... and risk cross-contamination.
 - or -
 Install Colombo Direct Delivery Systems for your critical areas and never worry about system-wide contamination.

Put your critical deliveries in a system that may have many carriers ahead of it... and wait.
 -or-
 Put your critical deliveries in a dedicated system that sends it off to its destination, immediately.

DIRECT DELIVERY SYSTEMS

- Fast, secure and dedicated
- Eliminates the possibility of clean & dirty cross-contamination
- Track and document all transactions.
- User confidence at a low cost
- Modern touchscreen interface
- Preventative Maintenance contracts availability
- A trusted name in quality products and service for five decades
